Designed to be a stunning beauty and ultra thin, LUXIMA'LED fits elegantly into your place. Quality materials, exceptional craftsmanship associated to an innovative technology, here is EKLER footprint. This model fits a homogeneous concept, every detail is optimized to fulfill its role to perfection. This quest for perfection is noticeable on both functional and dynamic exterior as well as a compact interior.

An elegant and sleek design, compactness and lightness unparalleled, a design promoting asepsis, here are the reasons why you will turn the new LUXIMA'LED your favorite medical lighting. High performance multimedia Lighting, LUXIMA'LED has all the latest technology and the power to magnify your office.

### The future is already

In terms of light no project can be any longer conceived without LED technology. EKLER is entrusted with the task of innovation, which gives to EKLER the role in its status of an innovative company. Next logical development undertaken after ASTRA'LED is LUXIMA'LED. It represents what is best in medical light. Its spectrum of daylight is specially selected to meet the standard requirements. Natural day light provided by LUXIMA'LED offer the best working conditions for the practitioner and his staff. A High Color Rendering Index (CRI > 90%) is a guarantee for the quality of shade taking and accuracy of the work. Over more LUXIMA'LED is designed to provide the maximum light onto the work area. The position of the light panels reduces the impact of the shadow brought by the head of the practitioner and this assistant which focus on the light field.

### LED screen Edge Full HD : Bright pictures with incredible contrast

Demand the best quality image. Imagine the details of an astounding clarity combined with high brightness, incredible contrast, a motion definition of great clarity, colors and realistic images, as well as reduced electricity consumption. The LED Full HD screen integrated into Luxima'LED offers more detail than a standard HD TV. And details in the image means more intense pleasure for you viewing.

So you will offer your patients a relaxing and usable environment. Multiple functions, video, TV and other media, create the atmosphere that will distract your patients away from the act that you administer and contribute to the release of anxiety and other phobias. They shall keep an unforgettable memory and will come back for sure.
